## Camp Outline

### **Day 1 and 2: Introduction to Claymation**

During our first 2 days, you'll learn how to create characters and props using clay, discover the principles of animation, such as timing and spacing, and creating a storyboard, as we write our script. If that sounds like a lot, it's because it is! And it's a ton of fun as you plan out your short movie!

### **Day 3 and 4: Animation Production**

On days 3 and 4, we put our plans into action. You'll learn how to capture your claymation frame by frame, create lighting techniques for story atmosphere, blocking techniques for character expression, green screen for background replacement, and sound design.

### **Day 5: Editing, Effects, Mixing and Output.**

This is the day of surprises where you'll take hundreds of still frames, dialogue, music, and sound effects, and mold them into a finished film. This is the day you will complete a finished short film, and share it with your family, friends, or the entire world.

Throughout the course, we will encourage creativity and experimentation, as we provide you with the tools and knowledge to continue your claymation journey beyond the five days. Join us and discover the magic of claymation!
